***Summary***

Claims 1,3,8,11 and 16-19 are the independent claims under consideration in this Office Action.

Claims 2,4-7,9,10 and 12-15 are the dependent claims under consideration in this Office Action.

***Claim Rejections - 35 U.S.C. § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-19 are rejected under 35 U.S.C. § 102(b) as being anticipated by Burrier (4,646,666).

Burrier teaches a method of precision sewing and joining fabric pieces for quilting. Burrier teaches forming shapes using square (30, figure 2, for example) and rectangular pieces (rectangular tape 36, figure 3, for example) and cutting and joining these so as to form square and rectangular shapes (see figure 1, for example). In the final pattern or design, larger squares and rectangle final shapes are formed by smaller square and rectangular initial pieces. The language "an eight point star" is considered

descriptive of a desired design. There is no language pertaining or defining a star in the body of the claims or any structure pertaining or defining eight points.

Claims 17-19 are rejected under 35 U.S.C. § 102(b) as being anticipated by Braden et al. (3,898,943).

Braden et al. teach a method of precision sewing and joining fabric pieces for making a quilt. Braden et al. teach forming shapes using square 1, figure 1, for example and rectangular pieces (figure 11, for example) and cutting and joining these so as to form square and rectangular shapes (see figure 14, for example). In the final pattern or design, larger squares and rectangle final shapes are formed by smaller square and rectangular initial pieces. The language "an eight point star" is considered descriptive of a desired design. There is no language pertaining or defining a star in the body of the claims or any structure pertaining or defining eight points.
